

I am opposed to the amendment of Section 69. It would be a mistake to model the Yukon Oil and Gas Act on the Alberta model where industries rights trump those of citizens. There needs to be regulation covering negotiations between land owners and stake holders on Crown land over access by oil and gas industries to that land. The spirit of the Oil and Gas Act should be about creating a healthy environment for development without putting what is in Yukoner's best interests above those of the oil and gas industries.

I am opposed to the removal of Section 13. If I was First Nations I would be marching in the streets over this.
